October 5, 2026

Dear Delta Health Center Employees:

We are pleased to announce the development of Delta Health Center's Employee Residency Program, an initiative designed to support the professional growth and development of our employees.

At Delta Health Center, we recognize that every employee has the potential to grow. This program will provide employees with opportunities to expand their knowledge, develop new skills, gain exposure to different areas of the organization, and prepare for future career opportunities.

The Employee Residency Program will include professional development opportunities, mentorship, exposure to various departments and organizational functions, and other learning experiences designed to help employees gain a broader understanding of Delta Health Center and its operations.

All employees are encouraged to participate, regardless of their current position or role within the organization. Whether you are interested in strengthening your skills in your current position, exploring other areas of the organization, or preparing for future advancement, this program is designed to provide opportunities for continued growth.

If you are interested in participating in the Employee Residency Program, please email the attached application to Vatecia N. Spann at vspann@deltahealthcenter.org by October 13, 2026, to express your interest.

Additional information regarding the program, including participation requirements and next steps, will be provided to those who express interest.

We are excited to invest in our employees and provide meaningful opportunities to learn, grow, and advance within Delta Health Center.

Sincerely,

John A. Fairman

John A. Fairman
Chief Executive Officer
